AI Integrations Engineer | Marketing Automation | Campaign Workflows | Lead Intelligence Systems

PROFESSIONAL SUMMARY

AI Integrations Engineer with ~ **3 years** of production experience building automation systems for marketing, sales, and campaign operations. Reduced manual workflows by **60–70%**, saved clients **100–300 hours/month** in operational overhead, and shipped end-to-end systems spanning lead generation, CRM sync, content automation, and KPI reporting. Expert in n8n, LangChain, RAG pipelines, and LLM-powered marketing applications.

PROFESSIONAL EXPERIENCE

AI Integrations Engineer

Apr 2025 – Present

Tkrupt

Lahore, Pakistan

- Architected agent-based automation for outbound sales ops — multi-stage lead sourcing, qualification, enrichment, and follow-ups across **5+ clients**, cutting labor costs by **\$15K/year**
- Engineered prospecting automation using **Clay** and **Apollo**, reducing manual effort by **70%** and enabling **3x** outreach scale; designed event-driven n8n workflows cutting failure rates by **60%**
- Built production RAG pipelines over **5K+ documents**, reducing analyst review cycles by **50%**; pioneered modular MCP-style agent layer cutting integration time by **40%**; led team of **3 engineers**

AI Engineer

Jul 2024 – Mar 2025

Zaltech AI

Lahore, Pakistan

- Architected a **multi-hierarchical RAG chatbot** for Busoga University — serving **1,000+ students** with **50+ concurrent users** at sub-5s response times across academic policies, course content, and admin FAQs
- Delivered production-grade AI systems end-to-end: fine-tuned Llama 3.1 (Unsloth) improving task accuracy by **40%**; implemented evaluation and monitoring pipelines for reliable deployments.

PROJECTS

Excelr8 | Founding Engineer | AI-Powered GTM Automation Platform

Jan 2026 – Present

Excelr8 automates lead research, campaign setup, CRM syncing, and reporting for GTM teams.

- Built GTM automation dashboard covering lead import, enrichment, campaign setup, CRM sync, and KPI reporting — cutting campaign launch time **from hours to minutes** across **4–8 campaigns/month**
- Engineered **LinkedIn Post Radar** surfacing warm leads from real engagement signals; integrated **HubSpot sync** eliminating **14–30 hrs/month** of manual CRM data entry
- Built AI newsletter generation pipeline — auto-pulling content by date and triggering structured AI production, saving **10–36 hours/month** of manual content assembly
- Delivered KPI dashboard tracking **500–2,000 leads/month** with zero manual report-building, giving leadership real-time campaign visibility

Zippit AI Content Engine | Automation Engineer | Automated SEO Blog System

Feb 2026 – Present

Zippit is a Dutch DTC health brand selling medical-grade mouth tape and nasal strips, helping 80,000+ people sleep and breathe better.

- Built automated content factory producing **2+ bilingual SEO articles daily** — replacing a **\$1K/month** agency operation with **\$50–100/month** in API costs (**10–20x** cost reduction)
- System compounds organic traffic at **15–30% month-over-month**; **20+ manual hours/week** saved with a single human review checkpoint
- Engineered EEAT quality via Perplexity citations + Pinecone RAG ensuring Google post-2023 ranking compliance; native Shopify multi-language via GraphQL Translations API — one URL, two languages, zero duplicate page penalties, **doubling** indexed content surface; **30+ articles/month** fully automated end-to-end

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL

ML/AI Frameworks: PyTorch, LangChain, LlamaIndex, LangGraph, Letta, Ollama, Unsloth

Databases & Vector Stores: PostgreSQL, Pinecone, Firebase, Supabase, Airtable

CRM: HubSpot, GoHighLevel (GHL)

Workflow Automation: n8n, Zapier

Data Enrichment & AI Tools: Clay, Apollo, Apify, HeyGen, Perplexity

APIs & Integrations: OpenAI API, Shopify API, Slack API, Twilio, Unipile, RSS Feeds

Developer Tools: Git, Docker, Cursor, Claude Code, NotebookLM

Cloud & Infrastructure: AWS, GCP, DigitalOcean
